How to enter a new RA/TA waiver for a student with a waiver from previous term

First, enter the student’s identification number or first and last name.

Then click Search.
If information is already populated in the fields of the CU Waiver Entry screen *for a prior term* you will need to create a new row for the correct term. You will not be able to simply overwrite a previous term. To enter the new term you will need to add a new waiver page, known as a row, by selecting the “+” button on the right.

Tip: Click on **View All** to see a history of all entries.

Click “+” to create a new row in which you can enter the current term waiver.
The top two entries will be identical. You will know you are in the correct row because the effective date will be the date you are entering the waiver.

Enter your new term information in the top row and delete any information that is no longer relevant.

**Important!** Do not change the effective date on the CU Waiver Entry screen. The effective date should always be the date you are entering the information, which is the default.
